MAILWALL REMOTE

ZERO EFFORT SECURITY

# MAILWALL REMOTE

## MANAGED EMAIL SECURITY

PROTECTION FROM E-MAIL THREATS SHOULD BE A GIVEN, NOT A WORRY

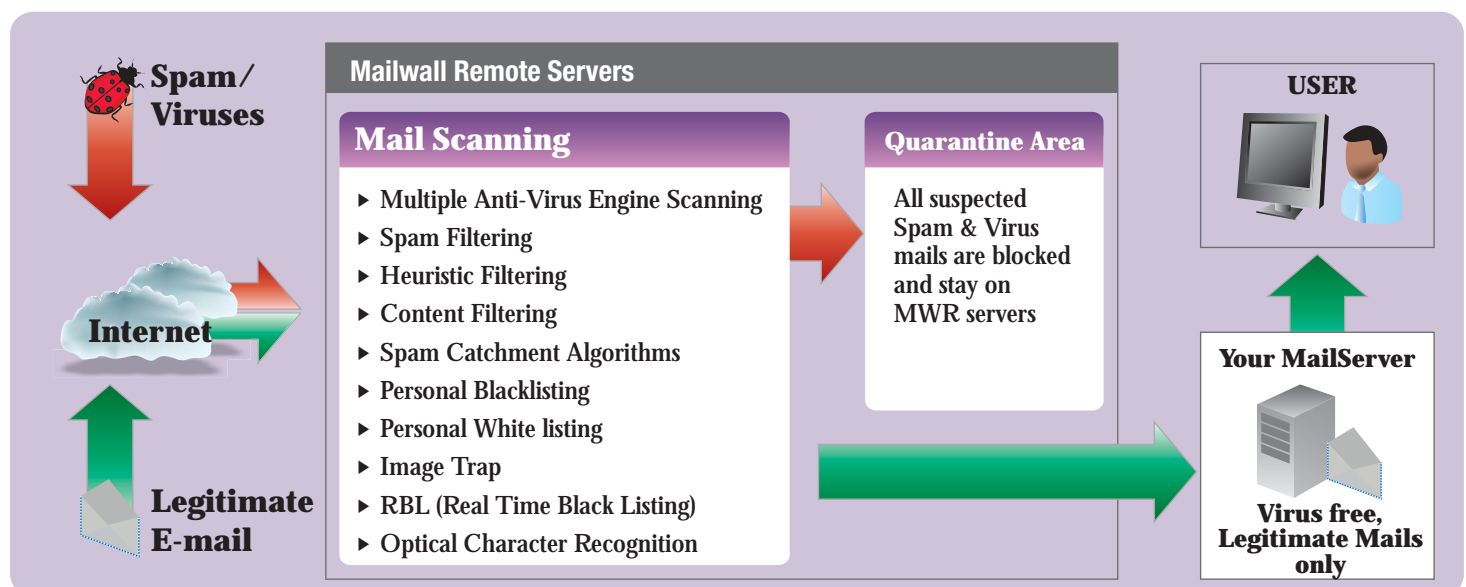

With Mailwall Remote, you can take mail security for granted. There's no software for you to download, no hardware to install, and you'll never have to take on additional resources to ensure mail security. We take care of everything for you.

Once you switch to Mailwall, you won't even notice that it's running. Threats are removed from mails before they can reach you, and your mails are automatically scanned for improper content. We keep your system updated for you and provide you with on-call technical support.

In fact, once you sign up for Mailwall Remote, you need never think about e-mail security again.

Now that's what we call zero effort security.

### Mailwall Remote Network Architecture

## Key Features

- Complete, all-in-one managed e-mail screening system
- 24/7 technical support
- Comprehensive usage reports on-line
- Protects confidentiality, adds legal disclaimers and guards e-mail transfer of sensitive information
- No changes to your e-mail infrastructure

Omniquad is a leading provider of enterprise network security solutions to customers around the world since 1995. With a presence in the UK, North America and Asia, Omniquad's cutting edge solutions have earned industry and media recognition. Currently Omniquad solutions cover a wide product & service spectrum: penetration testing, web content filtering and e-mail security. Headquartered in London, United Kingdom with regional branches in Europe and Asia, Omniquad has customers spanning the globe, ranging from companies and educational institutions to individuals.

Stops 100% Viruses

Stops 99% Spam

Stops Phishing

Stops Malware

## Easy initialisation

Just change the MX record for your mail domain so that it points to the Mailwall Remote address. All your incoming mail will be screened by one of our Mailwall Remote relays and forwarded to your mail server or ISP only after it has been thoroughly secured. Once you make the switch, there's nothing more for you to do - ever! We handle maintenance and send you regular reports.

## Invest only in security

Mailwall Remote offers you unmatched security; it's also your most cost-effective solution. There's no additional infrastructure to invest in, no extra burden on your systems administrator. We also protect you from operational issues or hidden expenses.

## Safe, reliable emails

We're able to offer you 99.99% service availability because we mirror our secure mail relays in key locations with prime backbone sites kept with multiple Internet Service Providers. The systems are located in high-security buildings with access control, power backup and fire suppression systems.

"We have now been with Omniquad for over a year and we have found the service to be exceptionally good, not had a virus related e-mail attack since moving to Omniquad, this has allowed the IT team to focus on the core business Activities."

Graeme Jackson  
IT Technical Team Leader

"Thank you for providing an excellent service over the last three years. Trace has been pleased both with the protection afforded by the spam filtration and of equal importance the comfort of having a 'disaster recovery' email system available by using the web interface should our own Exchange Server fail."

Andrew Booth  
Trace Group

Happy with the quality of the anti virus engine, this is the most important benefit to us and I'm impressed with it's performance so far

Stuart Mace  
RCP

".....the quarantine area offered a greater flexibility in actually viewing all of the Mails including source code and telling us exactly what rule it had matched or what Virus had been detected within the specific Mail. The reporting functionality is very comprehensive and means that we can produce Mail reports based on individual Mail domains in each country."

Alan Tilney  
Fujitsu

E-Mail Management was a time consuming task with scanning for Viruses and SPAM clogging up our Network. Using Mailwall RemoteTM we have been successful in stopping 100% of Viruses and over 99% of SPAM coming into the Network, as a result my time is no longer spent continually fire-fighting Mail issues.

Barry Howieson,  
Scottish Ambulance Service

It's also important to remember that the system is doing a very good job of stopping 1000's of virus infected emails and spam that would ordinarily end up in users inbox.

Steve Titchner,  
JST Group

"We have used Mailwall remote for several years now, initially we did tender to several similar companies, but we found no other company was able to provide a product which does what it says on the tin. This combined with professional ,quick support and value for money it was an easy decision."

Ben Posnasky  
Group IT Manager Doyleplc

You managed 100% catch on Sunday, Monday was About 98.5% (typically that's one email per 12 hour period), so yes doing well on the Spam catch!

Vince Horan,  
B&CE Benefit Schemes

"... we trialled a couple of Managed E-Mail solutions and Mailwall Remote was the one that gave us the most flexibility and also the best value for money."

A. M. Network  
Security Manager Sytner

"Caretower have been providing us with anti spam/virus systems for a number of years now. They were the obvious choice when it came to providing a new mail filtering system and disk encryption software."

Paul Farmer  
Head of IT Arsenal Football Club PLC

Just another example of the high quality fantastic support/service received from OMNIQUAD.  
For the whole month of June 2006,  
Incoming Email Total = 51207, Outgoing Email Total = 19832, Inbound Blocked Virus = 647 (100% Success), Inbound Blocked SPAM = 7623

K. Z. Network Administrator  
Bradford Community Housing
